Learn & Explore ATSC 3.0

TvXplorer quickly validates NextGen TV broadcast quality by displaying individual properties of the RF signal, bitrate, services, individual PLP status and much more. Easy recording and playback of PCAP or MPEG-2 TS streams. Messages provide dubug info with self-help guidance and alerts.

Computer Requirements

- Microsoft® Windows 10
- H.265 decoding
- 8 GB RAM
- 1 GB free disk space
- Sixth-generation or later dual-core or quad-core intel® i5, i7 CPU

For NextGen TV Trials, Deployments & Testing

TvXplorer™ Suite is what you need to verify and validate NextGen TV fast and effectively.

TvXplorer Suite combines professional test and measurement software with RedZone Receiver™ TV receivers that go with you on the road (or the boardroom) and won't break your budget.
