

PRODUCTION TEST TECHNICIAN

Comark is a world market leader in transmitters and RF support equipment for Broadcast Television and Scientific applications. We develop future proof solutions for our customers, and help them with their installation, service and support.

POSITION SUMMARY

The Production Test Technician will provide support to the manufacturing and engineering group in testing, trouble shooting and repair for procured and Comark manufactured products. This is a full-time permanent position.

ESSENTIAL FUNCTIONS

- Perform diversified manual and mechanical duties to test electronic components and assemblies of transmitter units
- Duties include visual inspection, testing wiring continuity and circuitry completeness
- Functional testing of assemblies; low power testing of completed transmitters and other similar duties primarily those pertaining to the electronic testing of components
- Duties include visual inspection, testing wiring continuity and circuitry completeness
- Functional testing of assemblies; low power testing of completed transmitters and other similar duties primarily those pertaining to the electronic testing of components

AREAS OF RESPONSIBILITY

- Read and interpret schematics and blueprints in order to develop run lists, ring out sheets for new assemblies and trouble shoot and repair at component level electronic digital boards among others
- Make recommendations as to improvements in assembly and/or testing procedures.
- Make recommendations regarding the development/building of new testing equipment
- Assist assembly department in resolving technical problems, as occasionally requested

QUALIFICATIONS

- Have an in-depth knowledge of electro-mechanical, PCB and sub-assembly testing
- Familiarity with RF, UHF, VHF filters, oscillators, power supplies and amplifiers would be a plus
- Must have experience with a variety of test equipment and be able to work from schematics and production documentation
- Knowledge of micro-controllers and embedded software is highly desirable
- Background in both digital and analog is preferred
- Ability to use Microsoft Office applications to create documentation, reports, etc.
- 3 years minimum experience required
